

Discover. Explore. Become.

Dr. David Swenson is serious about his research, whether it's *finding a cure* for Alzheimer's disease or working on ways to *reduce global hunger*.

He's equally serious about *having fun* in chemistry class, and at the tailgate parties where he serves his famous jambalya.

Dave loves what he does
and where he does it.
You can, too.

*Something More.
Something Better.*
