

## Dream. Learn. Become.

Education graduates who are considered some of the *best-prepared* in the state. Science and engineering students who work with faculty on *hands-on* research. Business majors *involved* in creating marketing plans for regional companies. Nursing students with *field experiences* that ready them for life. And liberal arts majors who shine on a campus that *celebrates creativity and culture*.

Learning here and by studying abroad. Hands-on, personal and powerful.

*Now that's an education.*

*Something More.  
Something Better.*
