

FREE Science Materials Available to All K-12 Teachers

Is your science budget a little thin this year? Don't have enough beakers and bottles to make a useful lab exercise? Catalog prices seem way out of reach? We may have a solution for you.

As a result of some inventory surplus, Dow Chemical and Dow Corning have donated approximately \$150,000 worth of science materials and glassware to the local American Chemical Society (ACS) for donation to area schools. You simply need to schedule a day and time to go to the warehouse for pick-up. You may do so by contacting local ACS representative, Mr. John Blizzard at 989-496-1434, or jdblizzard@quadsil.com. The warehouse is located at 210 Arrow Cove in Midland. Hours of operation are from 9-5, Monday through Friday.
