Saginaw Valley State University

College of Business & Management

7400 Bay Road, C326

University Center, Michigan 48710

**Education**

M.A., Economics, University of Pennsylvania

B.A., Economics and Urban Studies, Washington University

**Area of Expertise**

Ken Kousky is a veteran of the IT software and services industries. He is a visionary in the computing technology, education and marketing industry with three successful start-ups, two major mergers and an IPO under his belt. He's a sought-after professional speaker on topics such as national cyber security, corporate financial management and enterprise network security. Ken is CEO of IP3, Inc., an information security consulting firm. In 1988, Ken founded Wave Technologies to meet the growing demand for end-user and management technology training. Ken also served as Vice President at Novell, Inc., and President of NetWare Centers International, the subsidiary responsible for worldwide sales, distribution and support of the Novell product family. While at Novell, he managed 20 worldwide offices and grew the company to over 450 employees. Ken helped Novell grow from \$60 million to \$250 million in revenues in less than two years.

Ken has taught at the University of Pennsylvania and Washington University in both the School of Engineering, the School of Arts & Sciences and the Business School as a teaching fellow, adjunct professor, and as Director of the Center For Communications and Network Management and as a technologist. He has been a software industry executive and holds a CISSP, Certified Information Systems Security Professional.

Ken established Washington University's graduate program in Telecommunication Management, and directed the University's Center for Communications and Networking Management.

**Professional Activities**

Ken serves on several boards including the Saginaw Valley State University's College of Business & Management Advisory Board, IEEE New Standards Governance Committee, OpenUmbrella, Computers for Schools, St. Louis Public School Foundation, the Linux Professional Institute, the National Association of Black Telecommunications Professionals, Webster University's Business School Advisory Board, Washington University Arts and Sciences and National Council, and corporate advisory boards of Mira Computer Imaging Systems and CK Global among others.
