

Discover. Explore. Become.

If mid-Michigan is known as the region's medical and health hub, then SVSU is the place that readies the most knowledgeable, compassionate and prepared nursing, occupational therapy and medical technology students for careers that matter to us all.

An education that is not only about technical skills, but people talents. Learning that is hands-on, community-based and truly life altering.

Undergrad as well as a Master of Science in Nursing.
Now that's an education.

*Something More.
Something Better.*
