

SE&T Colloquium Series

Fall 2007

SPEAKER

Dr. Joe Shlien
Professor of Mechanical Engineering

TITLE

The Amazing Honeybee

ABSTRACT

Beekeeping as a hobby is fun, fascinating, and relatively inexpensive. In the colony of about 50,000 bees, each bee has her duty - from cleaning cells to undertaking to caring for the queen. The honey bee hive, its three types of bees, and their life cycles will be described. We will attempt to answer the question of how can we prevent these essential insects from disappearing.

DATE

Tuesday, September 25

TIME

4:30 – 5:20pm

PLACE

Pioneer 240

Refreshments will be served at 4:15pm.
