**Streaming Video: Added to Zahnow Library Collection**

The Zahnow Library now offers access to two high-quality, academic streaming video subscriptions. These collections are available to students, faculty, and staff at the “Databases” link at the library homepage. In conjunction with faculty, particularly those involved in online and hybrid instruction, library staff have chosen two multi-disciplinary collections to support learning and teaching. All videos include transcripts or closed captioning to support all users, may be embedded in VSpace, and are accessible on a variety of mobile devices. Both collections allow for unlimited, simultaneous use.

**VAST: Academic Video Online**: This comprehensive multidisciplinary streaming video collection brings together over 17,000 video titles in a wide range of disciplines, including award-winning films from BBC, PBS, Arthaus, CBS, Kino International, Documentary Educational Resources, California Newsreel, Opus Arte, Cinema Guild, Pennebaker Hegedus Films, Psychotherapy.net, Microtraining Associates, Filmmakers Library, Zeitgeist, First Run Features, and many more. Titles include documentaries, interviews, performances, news programs and news reels, field recordings, commercials, and raw footage.

**Ambrose Digital**: This smaller multidisciplinary collection of nearly 70 programs includes the 37 BBC Shakespeare Plays and other BBC Classics: *The Long Search*, Hughes’ *Shock of the New*, Bronowski’s *Ascent of Man*, Burke’s *Connections*, Leakey’s *The Making of Mankind*, Attenborough’s *The Living Planet*, and Cooke’s *America*.

Library staff welcome continued feedback on the content and usability of these collections. We will offer a workshop on using these streaming video collections in the fall. Grant Research Profile

Grant Forward is a service provider paid for by the University to assist faculty in locating funding opportunities which match their research interest. A newly added feature allows researchers to create a profile on Grant Forward consisting of a person’s research interests and personal information such as title and department.

Research interests are inferred by Grant Forward from multiple sources such as publication page, CV and Bibliography. Research Interests can also be individually added to the profile manually.

When a researcher’s profile is created, the funding opportunities that match his/her research interests are automatically identified and displayed in the Recommendations section. These opportunities can be filtered using the search options available in Grant Forward. The system will display individuals at SVSU which have created a profile and have a keyword that matches a funding opportunity listed in the Recommendation section.

You can showcase your research interests by embedding the tag cloud on your website as well. Visit https://www.grantforward.com or call Sponsored Programs at ext. 4295 for further information.
