

NIGHT OVER WATER

Physical Characteristics

Margaret: Twenty years old with red hair, deep green eyes, pale skin. This would make her a medium autumn. She sound like a Romantic to me but a Natural Romantic as opposed to a full Romantic. This simply means that during the day she would wear natural fabrics with soft, flowing lines and feminine details like lace and floral prints. This is known as the English rose look. In the evenings, as Harry supposes, she should wear full Romantic clothes. As she grows older she would probably tend to wear Romantic Classic clothes during the day.

Harry: Twenty five years old with fair hair (light ash to medium ash brown, blue eyes (that should change colour depending upon what he wears) tanned skin. This makes him a true summer like Patric. He is definitely a Classic Romantic. Perhaps he should wear a midnight blue dinner jacket instead of a black one like Edward VIII (another Summer Classic Romantic).

Diana: Thirty four years old with blonde hair, blue eyes, clear skin. This would definitely make her a spring. Is her hair naturally blonde or dyed? Most springs dye it white blonde. I have a littel trouble with her as a Gamine but that is probably because I have only met her in her first incarnation. If she is to be a gamine she will have to become somewhat less voluptuous and more pert and snappy. I personally see her as an Ingenue - very like Madonna.

Mervyn: Forty four years old with black hair going grey, brown eyes, sallow skin. He definitely sounds like a winter and a dramatic. To diffentiate him from Nancy I would make him a soft winter with deep blue eyes. I would also make him quite tall with eyebrows like yours - especially the one which can go up quizzically on its own.

Mark: Thirty five years old with brown hair (medium ash brown), blue eyes (I would be inclined to make these hazel just to differentiate him from Harry) and tanned skin. Again for purposes of differentiation I would make his skin freckled. A sandy summer, rather like Alan Curtis or Jo Miller. I saw him as small, neat and slightly fussy. Much more a Classic Gamin than a Natural Classic though he could be either, depending on how tall you make him. A Gamin is often charming in a rather boyish way and he strikes me as that.

Nancy: Forty years old with brown eyes, black hair and a dark skin. A Classic Ingenue. I have trouble with this description as I see Nancy as more powerful. Ideally I would like her to be a Dramatic Classic with black hair, brown eyes and an olive skin. This would allow her to dress in trim tailored clothes which made her look elegant and sophisticated rather than Edwardian and sweet. As a Classic Ingenue she would not provided enough Yang contrast to Diana's Yin charm.

Ted: Thirty years old with dark brown hair, blue eyes and a sallow skin. Definitely a dark summer and a natural. How tall is he ? I like to think of him with a squarish body and strong, capable hands.

Carol-Ann: Twenty five years old with blonde hair, blue eyes, tanned skin, a blonde summer and an Ingenue. I think that you have probably got too many Ingenues in this book ! I see her more as a Natural or a Natural Classic. An active girl who does not much like make-up and frills and wears her hair long and loose.

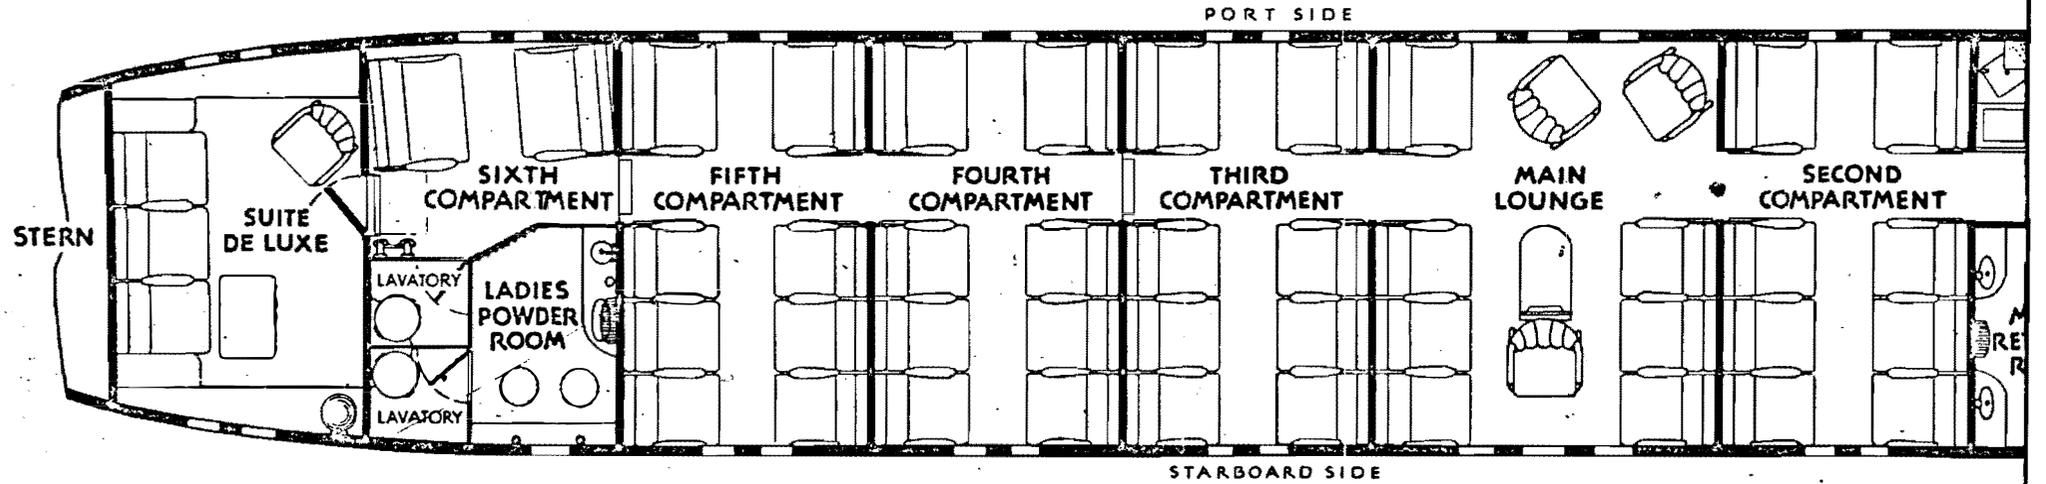

Hope this is helpful. I attach a set of clothing personalities.
