Affairs

THE INTERIOR

November 20, 1973

Our Tenth Anniversary next Tuesday really is our party, and hopefully, the entire college will find the time to participate, eat a piece of birthday cake, and for one day sit back and reflect on the things we have accomplished.

It would be nice if faculty members with classes that interfere with the noon luncheon would move those classes to the gymnasium for the Loren Eiseley lecture, and the awarding of the Franc Landee medal. The faculty is invited to the luncheon, and the students can come in after the lunch and hear the talk. It will be a good one.

The evening faculty is invited to do the same thing. Talks by Edward N. Cole, General Motors president, and Governor William G. Milliken will feature this program, and the students might be interested. The invitation is warmly extended.

The afternoon program at 4 p.m. is a tribute to the Chemistry Department and the entire science program. The American Chemical Society will present the official ACS accreditation at this time, and Phil Kumler will represent the Chemistry Department.

Our newest addition to the staff is K. Dale Harbin, Admissions Counselor. Dale is a 1973 graduate of SVC, and previously employed by Consumers Power Company. He lives in Caro.

Visited the new Student Activities Office yet? It is in Room 301, phone extension 289, and is staffed by some very capable students who are willing and able to help faculty, students, and staff members coordinate and publicize campus activities. Louise Ferris, Student Activities Director, since April has had the added responsibilities of counseling transfer and readmitted students. So if she is busy with these duties, don't fret. The Activities Staff is waiting for you and your project.
