The Presidential Search Committee today invites applications from the employees of Saginaw Valley College for the position of President. Applications, nominations, and inquiries should be sent to Dr. Curtis McCray's office, 347 Wickes Hall. The Committee seeks candidates with an earned doctoral degree and will give preference to candidates with higher level administrative experience.

The Board of Control met last night and did these things:

Left undergraduate tuition stand at $17 a credit hour, but raised graduate tuition to $25 a credit hour for Michigan residents and $55 an hour for out-of-state residents, and established a $35 per hour tuition for all adult education classes.

Dr. William Smith, president of the Faculty Association, announced these persons as the association's negotiating team: Donald Novey, Dr. Eric Petersen, Dr. Janet Robinson, Dr. David Weaver, and Dr. Robert Yien. The Administration's team includes Dr. Walter T. James, Morton Weldy, Allan Orr, and Richard Bologna.

A bid of $38.75 a seat for 400 seats for the new theater was accepted. The low bidder is the Dew-El Company. A bid of the Bourdow Trucking Co. to grade the 4 acres of land between the dorms and the gym at $850 was accepted. A fifth acre, the land between the sidewalk and the drain ditch just east of Wickes Hall, also will be graded. The seeding of this area will be completed this month, and the new playing fields will be ready for use next September.

The first step toward construction of the football stadium was taken when the Board approved a resolution requesting the SVC Development Fund to consider release of money for preliminary planning and the purchase of top soil. The stadium will be located east of Davis Road at the Pierce Road intersection.

A leave of absence without pay from winter semester teaching duties was approved for Dr. William Owsley.

Dr. William Capitain announced admissions and applications for September are up. In March, admissions and applications were up 50 per cent over the same month a year ago.

Plans for a dedication ceremony of the new observatory are being made by Dr. Brian Chow and Dr. Curtis McCray.

A workshop to explain financial aid to returning SVC students will take place from 1 p.m. to 3 p.m. Thursday in the Wickes Lecture Hall. Paul Gill is in charge.

Dr. Brian Chow's article "The Analysis of Gamma-Gamma Directional Correlations in a Triple Cascade" will be published in the next issue of "Nuclear Instruments and Methods." The article originated from research done during the last two spring terms when Dr. Chow was employed as a postdoctoral scholar by the Physics Department at the University of Michigan.

Dr. Peter DeJong and Dr. Philip Kumler had a paper published in the March 1974 issue of "Journal of Chemical Education." The paper is "Preparation of Immobilized Enzymes and Determination of PH Activity Profile. An Integrated Organic-Biology Experiment." This paper is one of the results of the continuing efforts on the part of these two faculty members to design experiments for both biology and chemistry laboratories which are truly interdisciplinary.
