

# SE&T Colloquium Series-Winter 2013

Speaker	Mr. John R. Engquist New Business Applications Manager Powder Metal Burgess-Norton Host: Dr. Tom Kullgren
Title	<b><i>Introduction to Powder Metallurgy Applications, Engineering and Careers</i></b>
Abstract	<p>This presentation briefly illustrates how Powder Metallurgy (PM) touches many common applications. A broad spectrum of technologies using metal powders are presented.</p> <p>A brief discussion of the mechanisms for developing strength in uni-axial compaction and sintering along with engineering roles and career opportunities are offered. A collection of case studies demonstrates current applications for the technology.</p> <p>There is a serious but light hearted look at some of the roles and skill sets engineers need to be successful and effective.</p>
Date	Tuesday, February 26
Time	4:10-5:00pm
Place	Pioneer 240
	Refreshments will be served at 4:00pm.
