

## SE&T Colloquium Series-Fall 2012

Speaker	Dr. Steve Taber Department of Biology
Title	<i>Two New Animal Species Discovered in Michigan</i>
Abstract	Illustrations of four previously unknown animal species are presented with a discussion of what little is known of their biologies and how this kind of research is conducted. All four species are flies of western Michigan swampland and forest that were discovered in 2012.
Date	Tuesday, October 23
Time	4:10-5:00pm
Place	Pioneer 240
	Refreshments will be served at 4:00pm.
