

# SE&T Colloquium Series

## Winter 2008

SPEAKER

Dr. Il-Hyung Cho  
Department of Computer Science

TITLE

*Computer Security and Forensics*

ABSTRACT

Computer and network security is a growing concern to all organizations and individuals worldwide. Computer forensics involves obtaining and analyzing digital information for use as evidence in civil, criminal, or administrative cases. This talk will show what is computer forensics and present some of the real criminal cases involving digital crimes. It will also show the internals of file structures and simple techniques of hiding and revealing information using publically available tools.
