

SE&T Colloquium Series

Winter 2009

SPEAKER

Mr. Christopher Pogue, CISSP, CEH, QSA
Senior Security Consultant, SpiderLabs
Trustwave-Information Security and Compliance

Host: Dr. Il-Hyung Cho

TITLE

Beyond the 1s and 0s: Forensic Lessons From the Field

ABSTRACT

As more and more businesses at every level move to a technical payment solution, cyber-criminals are taking notice, and focusing their attacks. In today's world of online purchasing and credit/dept card proliferation, thieves no longer wear trench coats, fedora's and go by the name of Big Vinny! They have laptops, and have names like cr@ck3r, b@ckl@\$h, and @11y0urb@s3. They don't hold you at gun point and steal your cash, they sneak in through system vulnerabilities, and steal hundreds of thousands of credit card numbers. They are organized, and they are on the hunt. By all accounts, Cyber-Crime is absolutely on the rise.
