HOW TO GET IN ANYWHERE, ANYTIME-Video

$59.95
IN-VT-065

Are you truly safe behind locked doors? How quickly can your locks be defeated? How do you pick a lock, force a door or blow a safe? Nearly two full hours of step-by-step instruction details the use of computer-generated picks, rocker, magnetic lock picking, lockaid guns and electronic picks. Whether you're a locksmith, copy, detective, or just a concerned citizen, you cannot afford to miss this exceptional tape. A manufacturers list is included. 120 minutes, color.

Assorted videos, books, and lock-picking devices that are probably too low tech for your purposes.

MODERN HIGH-SECURITY LOCKS
How to Open Them
by Steven Hampton

Master locksmith Steven Hampton takes the art of picking locks one step further with Modern High-Security Locks. Here, he collects some of today’s most popular pick-resistant locks and sets out to see which ones live up to their claims. Generally speaking, the more complex a lock, the more secure it is. However complex the lock gets, though, it must be durable, dependable, and user-friendly. It has to be tough enough to endure physical attack, but it can’t be machined too tight or it will jam up with just a breath of dust. It must be simple and easy to lock and unlock with its key, or the customer will not pay the higher price for it. It is this delicate balance between security and utility that allows the locksmith to open this new generation of locks.

Hampton shows locksmiths how each lock is picked and how long it will take. He details the tools of the trade and includes patterns and instructions for making your own picks and tension wrenches. He even includes ancient Tibetan Buddhist tantric visualization exercises to help locksmiths learn to "see" the inner workings of the lock within the mind’s eye. Veteran locksmiths or those new to the trade will find Hampton’s latest book an invaluable sourcebook. For academic study only.

2002, 5½ x 8½, 148 pp., illustrated, soft cover.

Electric picks are great tools, and this one is very effective and of high quality in both design and durability. It is well worth the extra cash.

This pick features an easy adjust knob and a rechargeable feature. Like a rechargeable electric screw driver the pick has a mounting base that is used to recharge the battery.
Tumbler Picks
Item #: PHX-MP137/A8, w/ Instructions

With more and more higher security tubular locks being used now, an innovative new bypass approach is necessary. The Mini-Pick® is the answer. It is the most advanced design tubular lock pick on the market today. It is precision-made to exacting tolerances and of the finest materials.

But, best of all, it works! It is an easy-to-use pick that can open a tubular lock in less than a minute after just a little practice. The chrome Mini-Pick® is only 13/4" in length, so it will not allow you to accidentally over-torque.

The Mini-Pick® model MP-137 is for 7 pin 137 Ace tubular locks. The Mini-Pick® model MP-A8 is for 8 pin Ace, 7 pin offset left, and 7 pin offset right tubular locks. Instructions included.

Restricted Sale Item:

The sale of lockpicking items to the public is regulated by 39 USC §3002a(a), and as such, these items require us to obtain a certification form from you before we may ship your order. For more information, please click here.
