

# Elevated Paint Booth Platform

**Recognition of Need:** A platform to safely assist the painting process at height without impeding workflow.

## Objectives

### Function

- Allow for the safe reach of all portions of varying sizes of vessel for painting

### Size

- Must fit within existing booth
- Avoid all wall fittings and sprinkler systems
- Allows vessels to enter and exit the booth
- Allows painters to access lower portion of vessel

### Budget

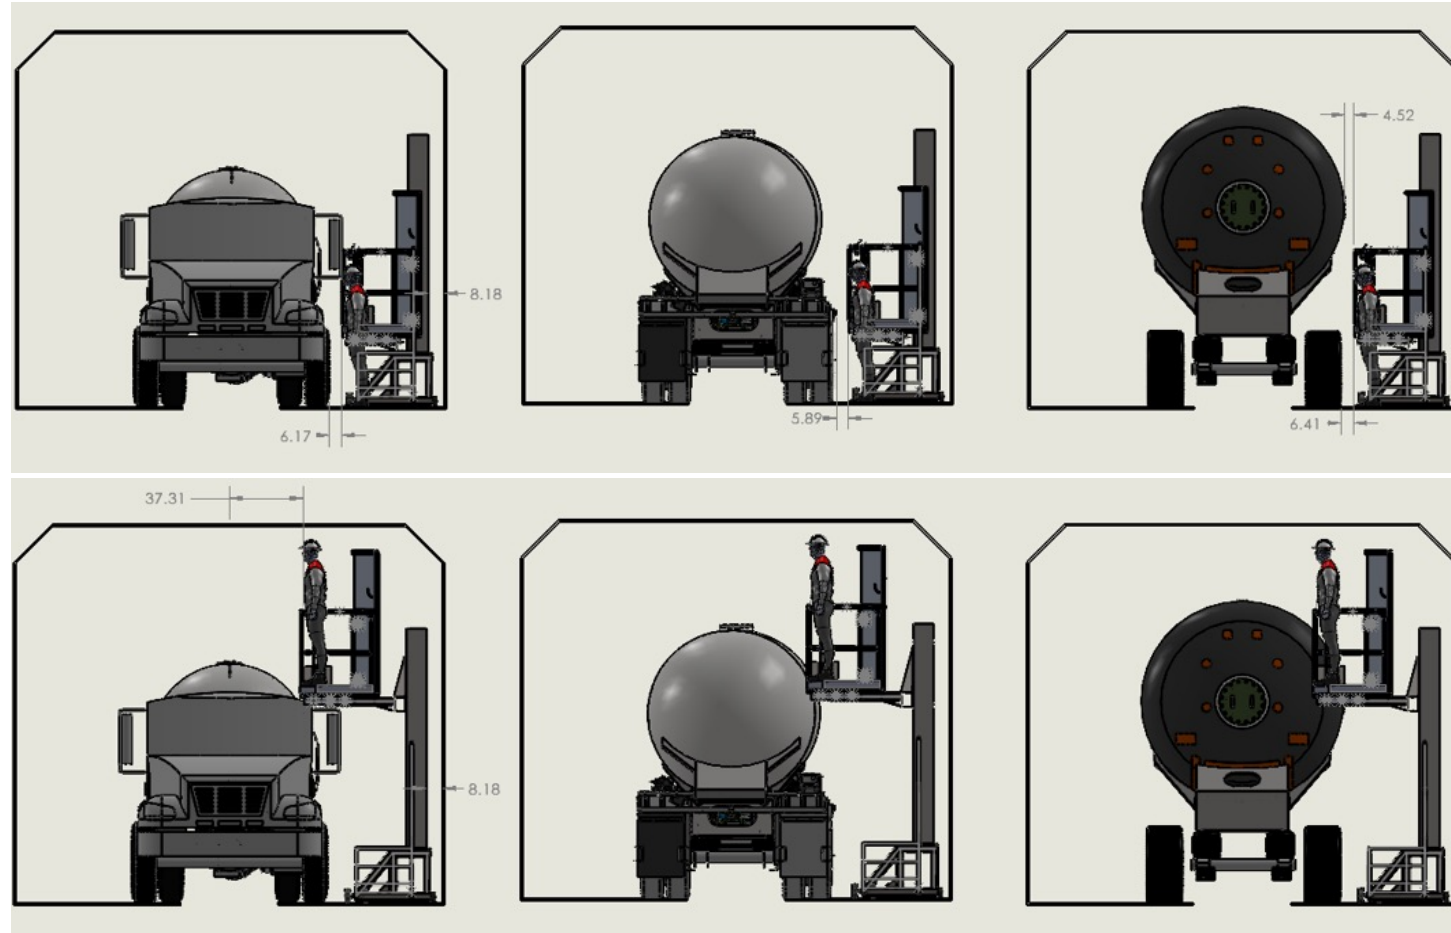

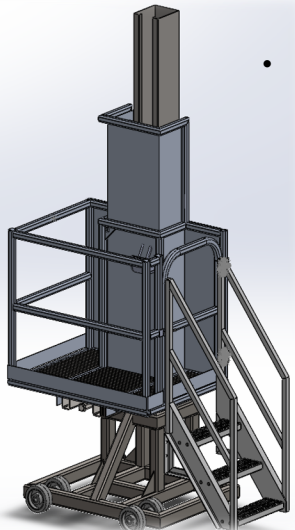

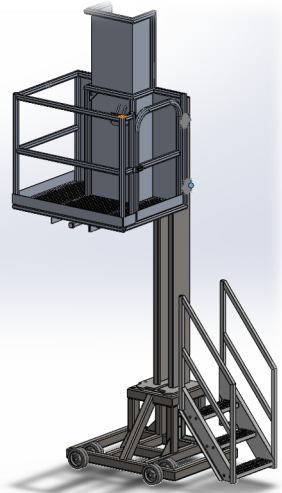

- Final Pricing: Projected \$30,000 for two

### Features

- 3 axes of movement
- Operate in a heat cycled, explosion hazard environment
- Pneumatically actuated

### Safety Standards

- OSHA
- MiOSHA
- ANSI A92.6-2006-Self-Propelled Elevated Work Platforms
