Subject: covid vaccine update

Good morning,

Healthsource has finally received some guidance concerning the required Covid vaccine. We will be requiring all workers and all students/instructors on clinical rotations to have their first dose of the vaccine by December 5th and to be FULLY vaccinated by January 4th.

There is a process for medical and religious exemptions. Religious and medical documentation (physician signature required) for the exemptions need to be submitted to healthsource. Our infection control committee then reviews the requests and approves or denies the requests.

I will pass along any more updates as I receive them.

Steve
