

As a leader and trusted voice in our communities, our patients and members expect that we are taking every possible measure to create a safe and healthy environment. We want to make that same promise to you.

Since we administered our very first COVID-19 vaccination last December, we have consistently advocated for vaccination as the best path forward for all of us. As the data and science continues to reinforce the safety and effectiveness of these vaccines, and with the expectation that the FDA will grant permanent approval to Pfizer and other vaccinations soon – we have made the decision to **mandate the COVID-19 vaccination for all team members, students, contractors and volunteers as of September 10, 2021.**

Safety and infection prevention are everyone’s responsibility and we must take every measure to protect ourselves and our customers. We are not the first organization to do this, nor will we be the last. But we are confident that this decision is right for us, right now.

To receive the vaccine students may:

- Make an appointment at any Henry Ford Employee Health clinic using MyChart or call (313) 651-1119. Same day appointments are available.
- Walking into any of Henry Ford’s large vaccination sites or make an appointment at henryford.com/vaccine.
- Walking in or making an appointment at any place offering the vaccine, like CVS, Meijer, etc.

Compassion is one of our four core values. It’s a promise to provide a heartfelt experience to every patient, member, and each other. There’s no greater compassion we can show each other right now than to be vigilant about safety and preventing the spread of this devastating disease.

Sincerely,
Mary
