

Hello,

This is information from our executive team regarding COVID vaccinations for your students.

“Yesterday the executive team discussed the requirements for all clinical students regarding having the covid vaccine before they begin clinicals onsite at MMH. It was determined that all clinical students must be vaccinated with the covid vaccine. Before being on site for their clinicals, they must have received at least one dose and then provide document of the 2nd dose approximately 3-4 weeks after the 1st dose depending on the which vaccine received (unless they have received the Johnson & Johnson 1 dose vaccine).” The student should receive a immunization card that can be uploaded to ACEMAPP for our review.

The e mail also states that student will be required to have a flu vaccination prior to their rotation. I have also addressed this in ACEMAPP under your rotation comment.

Please let me know if you have any questions.
