

Hello,

Thank you for the feedback in response to the COVID vaccine requirement for students and instructors. Attached are the following documents:

1. **Letter regarding the requirement:** COVID vaccine or approved medical and religious exemptions. It is the schools responsibility to review medical and religious exemptions. Students can come to our site but only with a vaccine if the schools are not planning to implement the exemption process.
2. **Medical Exemption form example**
3. **Religious Exemption form example**
4. **COVID-19 Vaccine attestation Form:** Could be completed by the school if not providing other documentation such as a signed approved exemption form, copy of a COVID vaccine card (fully vaccinated), or completion of a Health Certification form. Documentation in ACEMAPP.

If the student is also an employee of St. Joe's hospital, the employee will run through the Trinity exemption process. The Trinity approved exemption to be in ACEMAPP.

Deadline for compliance with the COVID-19 Vaccine requirement – fully vaccinated or approved medical/religious exemption: **September 21, 2021**. If a student starts clinicals before the September 21, 2021 deadline, the student must be fully vaccinated or have an approved medical/religious exemption to complete the rotation.

The requirement will be in ACEMAPP soon!

Please do not hesitate to contact me with questions.

Thank you,

Susan Karasinski MSN, RN, NPD-BC
