Subject: students and vaccine

Danielle

I just received word from our CEO that yes, students will have to be vaccinated. That is included in the mandate – students and interns.

We are learning more every day and will let you know regarding the potential exemptions (medical and religious). Right now it looks like first dose has to be given by December 5th to be fully vaccinated by January 2, 2022.

Sterling Area Health center requires all students to be fully vaccinated. They will not accept students in the midst of their vaccine series and consider fully vaccinated to mean 2 weeks after their final dose. They also do not accept any exemptions religious or medical for students.
